DESCRIPTORS: *Glucagon, *Amino acids, Drugs, *Blood serum, Blood chemistry, Biochemistry, Hypoglycemia, Biological assay.

The behavior of the total amino acids and of the inorganic phosphate in the serum, as well as of blood sugar, was investigated on healthy experimental persons after subcutaneous injection of 2 mg. of glucagon. The pre-Biological Sciences--Pharmacology, TT, v. 10, no. 10)

63-16516

I. Weinges, K. F.

1052311

Office of Technical Services

viously described, known increase of blood sugar and decrease of inorganic phosphate in the serum after glucagon were confirmed. In contrast to Appel and in agreement with Bondy and Cardillo, a significant decrease of the total amino acids in the serum was found. After 2 hours they fall to a minimum of 75% of the initial value and after 6 hours return to normal values.

and their evaluation. Part II discusses investigations of the propeller element; the relation between efficiency and power; relation between pitch, blade-width ratio and power; effect of a diffuser; irregularity effects. Part III considers the behavior of the entire propeller. Part IV treats the effect of the propeller on the airplane. An extensive compilation of propeller tests and a bibliography are contained in the appendix.
